BRIDGE RESOURCE MANAGEMENT (BRM)

INTRODUCTION

This course provides training for the management and development of resources available to navigating officers to enhance the effective and efficient functioning onboard.

The course principally focuses on the identification and development of human resources. The course illustrates typical situations connected with bridge and cargo operations on board and highlights methods for dealing and handling with problems and crisis situation.

The syllabus of this course is in accordance with and satisfies **Regulation VIII/2 of the International Convention on Standards of Training, Certification and Watch keeping for Seafarers 2010 and table A-II/1, table A-II/2** of the STCW code as applicable.

OBJECTIVE

A trainee successfully completing this course will have identified the resources available, which contribute to the functioning on board ship. They will have considered the assets and liabilities of resources and identified methods for management and development of these resources.
