

TRAINING FOR TRAINERS AND ASSESSORS (TFTA)

INTRODUCTION

This DG Shipping approved course fulfils the requirements of International Convention on Standards of Training, Certification and Watch-keeping for Seafarers (STCW 95), Regulation I/6 Training and Assessment and Section A-I/6 of the STCW Code and partial requirements of Regulation I/8, and Section A-I/8 of the STCW Code.

OBJECTIVE

Maritime lecturers chosen for the conduct of Certificate of Competency and modular courses will be fully qualified in the subject matter of the courses which they are going to teach. They may however be less familiar with training techniques and the effective conduct of training courses.

Each certificate of competency and modular courses package contains some advice to the lecturer in the form of references and guidelines, which will assist in the conduct of the course. In addition, the guidelines on the implementation of IMO Model courses provide valuable references of lectures and presentations and general course conduct. Nevertheless, it is considered necessary to offer a full course for maritime lecturers and assessors, which would not only review current training techniques but also actually provide experience of course management and training techniques to lecturers. While it is specifically concerned with those skills required for efficient implementation of the IMO model course it is believed to be of general benefit for the conduct of other courses as well.

Participants successfully completing the training course for trainers and assessors should be capable of understanding the processes and objects of learning and training and have a sound comprehension of assessing participants and course evaluation. They should be fully capable of undertaking lecturers' responsibilities within field of substantive qualifications, and conduct courses effectively.

FEATURES

1. The lecturers for this course are experienced Master Mariners, Marine Engineers, Shipping Managers and other experts in the field of education and training who have experience in shipping industry, training, and assessment and communication skills.
2. A practical approach has been adopted for conducting the course, and for this purpose a mix of various training methodologies are used – interactive sessions, lecture, group discussions, case studies, presentation by the participants
3. At the end of the course, participants would be required to make a final resentation/demonstration. The assessment is based on the class performance and final presentation/performance.
